クロックワークプラネット

Clockwork Planet

死んだ都市（クリッド）・三重（みえ）。明（あき）らかな異常事態（いじょうじたい）。その原因（げんいん）は？

A dead city, Mie. Clearly an unnatural situation. What could be the cause?

We have easily broken into the factory.

Yeah... Huh?

There's something within the deepest part of the factory.

"Some-thing"?

It's not moving, so I can't tell what it is exactly...

but it's definitely big.

It's the size of a whole city block--- A building...?

There's no mistake.

It's below here.

Let's enter through here.

H

Wah!

Please, allow me.

Don't let your guard down. This whole thing smells.

What's with the long face?

Halter, surely you don't have the leg strength for that.

Let's use an anchor wire.

Got it.

This isn't normal, no matter how you look at it.

SO FAR OUR ENTRY HAS BEEN SO SMOOTH THAT IT'S ACTUALLY A LETDOWN.

EVEN SO...

IT DEFINITELY FEELS LIKE THERE'S SOMETHING MYSTERIOUS GOING ON.

THIS IS---

THAT'S IT.

AND RIGHT THEN, SOMETHING TOTALLY UNEXPECTED HAPPENS.

FOR EXAMPLE, SOMETHING LIKE THAT---

IT'S A FEELING OF DEJA VU, LIKE WHEN A WELL-ARMED ARMY ENCOUNTERS NO ENEMY OPPOSITION AND IS ADVANCING WITHOUT A CARE.

LIKE NOT NOTICING YOU'VE JUMPED RIGHT INTO AN ENEMY KILLZONE.

COR-REC-TION:

I'M SURE OF IT.

A FEELING LIKE SOME SERIOUS SHIT IS LYING IN WAIT.

...Say,

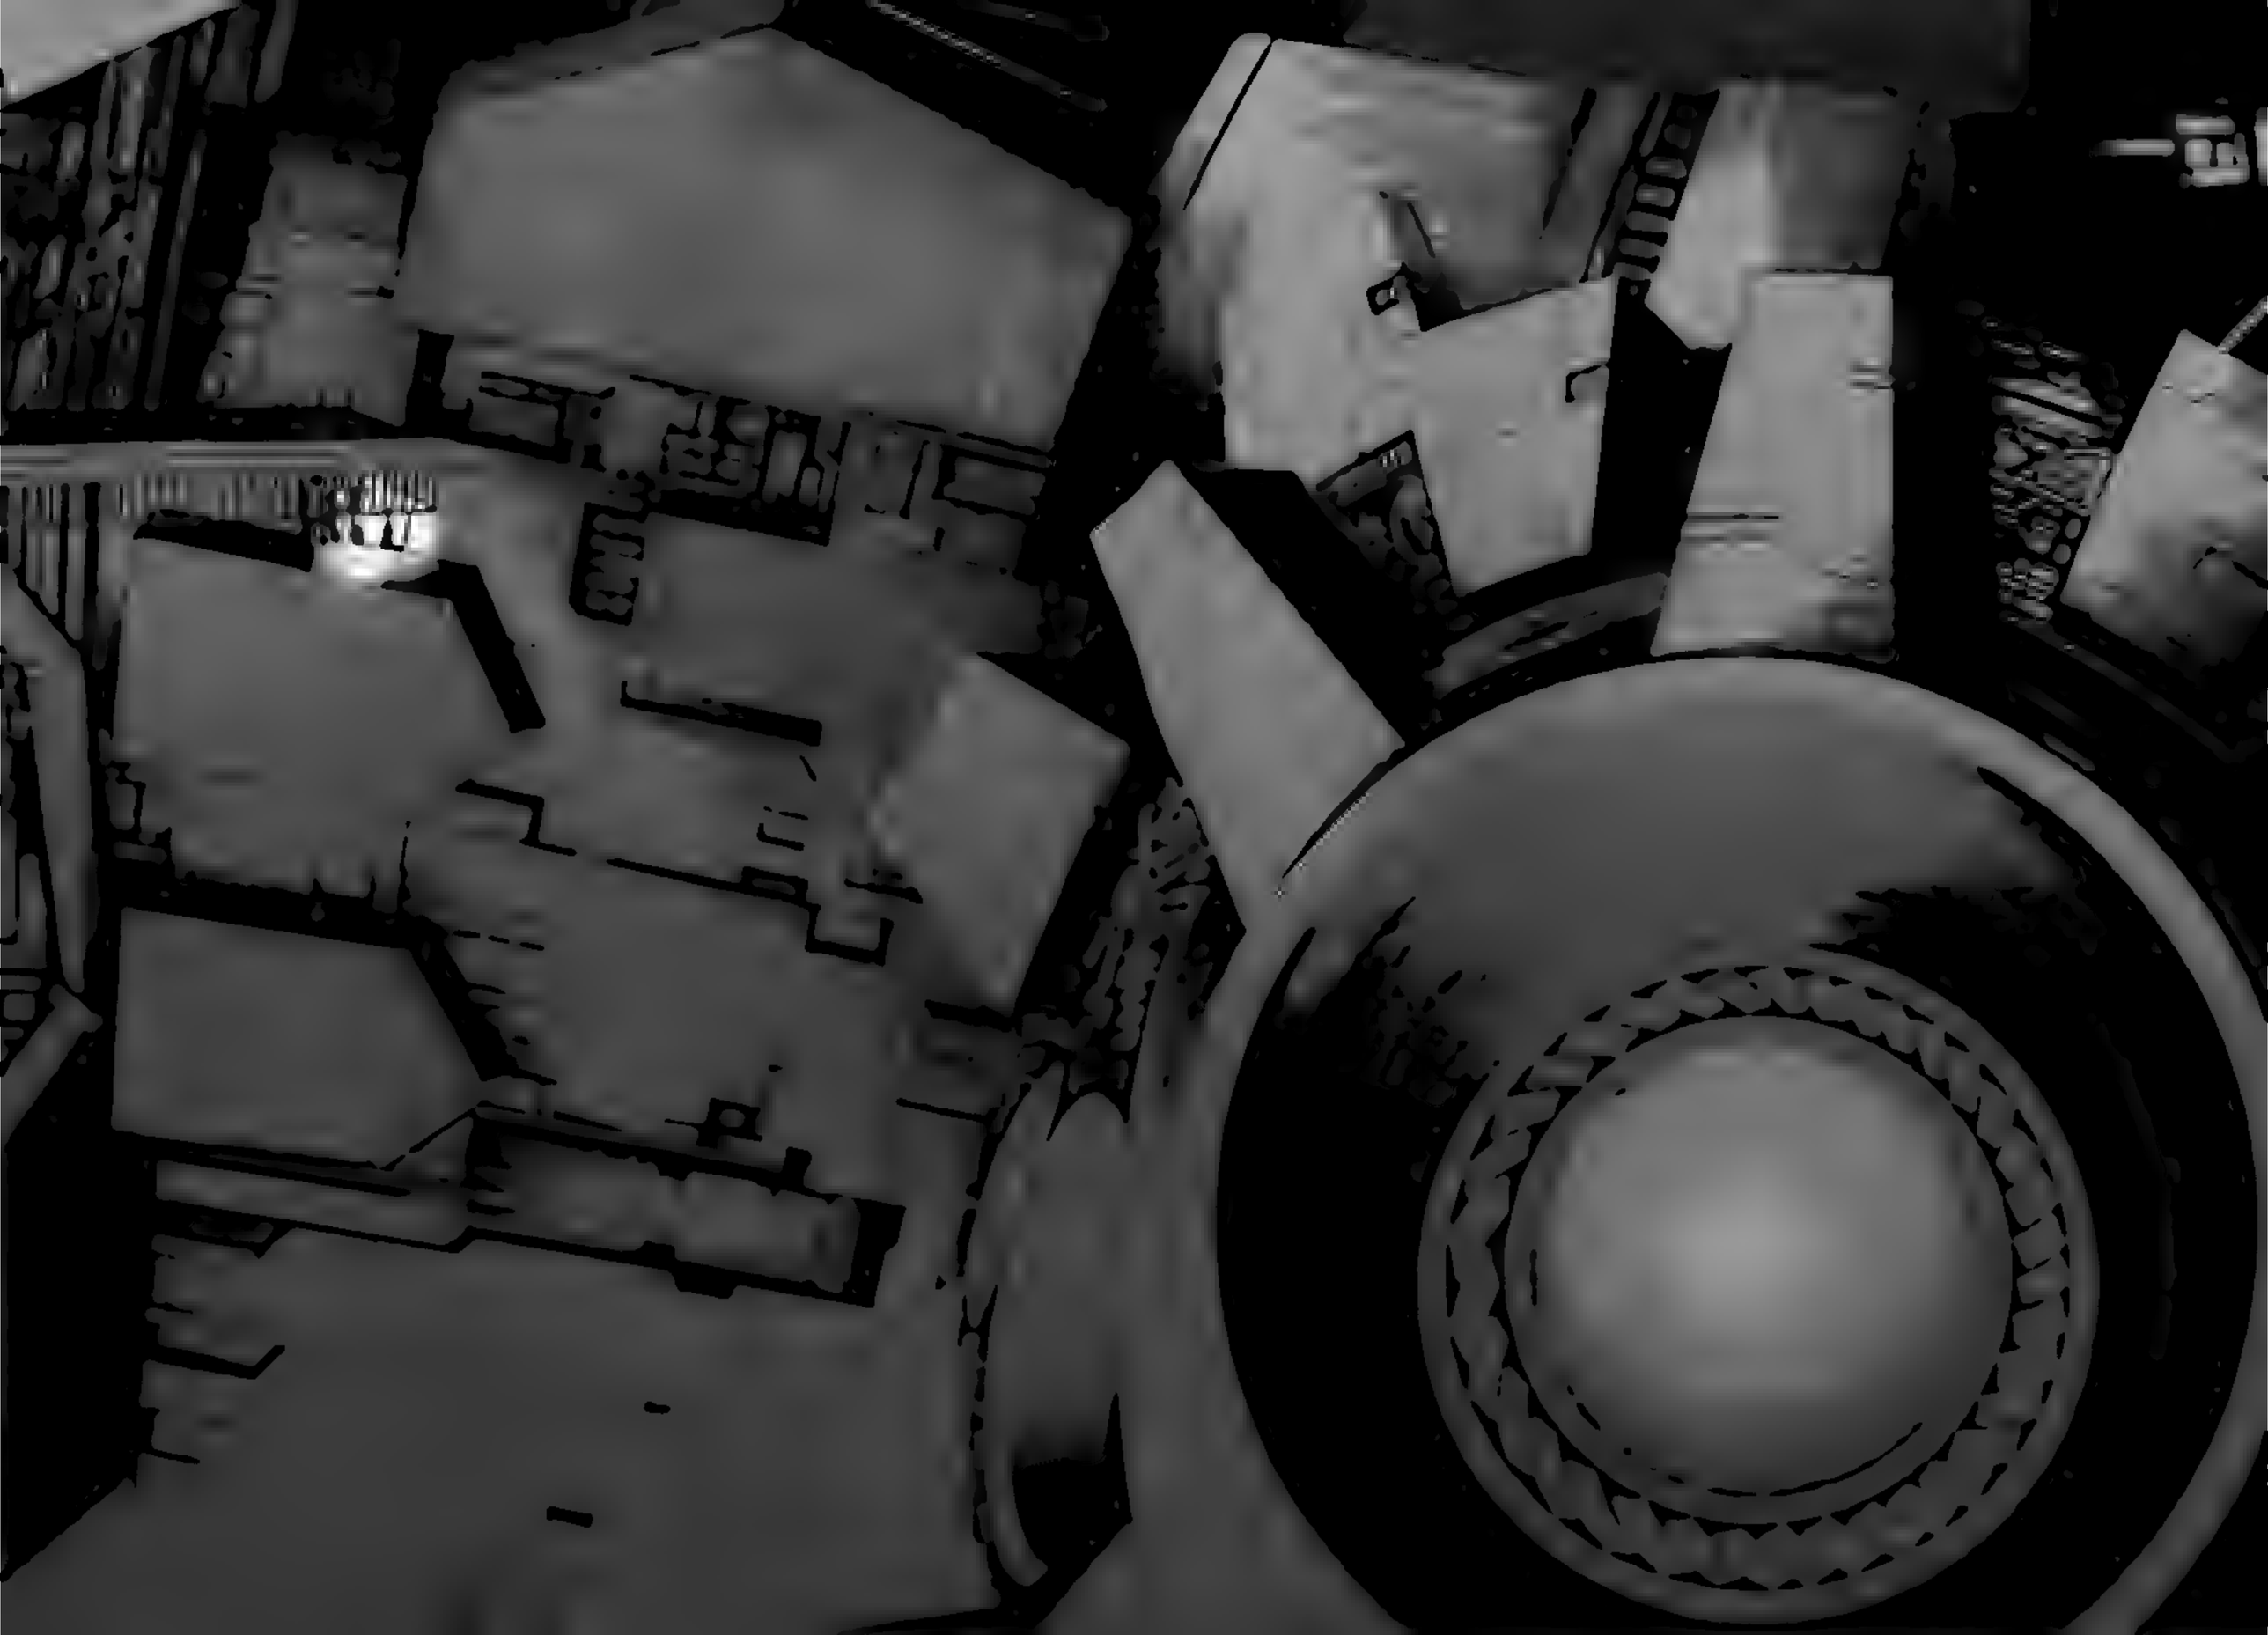
We've gotten down, but we can't see a thing in this darkness.

This is...

Marie.

110 ?

Hold on, I'll light it up with a flash charge.



This is...

a gigantic weapon...!

Your scythe took out those military automata instantly. That might work, right!?

YOU CAN BREAK IT APART, RIGHT?

RYUZU!

THIS CAN'T POSSIBLY MOVE, CAN IT?!

AS IF I'D KNOW!

A HUGE W-WEAPON?! WHY WOULD SOMETHING LIKE THAT BE IN MIE?!

HIIEEE

If Naoto-sama commands me so.

?!

YOU'VE MADE YOUR POINT!

Marie-sama, you are asking me if I can cut through a tungsten alloy with a table knife. Such a deplorable mental capacity is---

It repelled RyuZu's scythe?!

You can't break it?

This is a surprise.

Uhm... 320m high, 932m in length.

It's perfectly capable of movement.

Naoto,

just how big is this thing?!

PLUS IT'S EXTRAORDINARILY LARGE.

MOREOVER, RYUZU'S SCYTHE HAD NO EFFECT,

MEANING THAT EXISTING WEAPONRY WILL ALSO BE INEFFECTIVE.

no city would be safe.

If this thing did start to move,

The cities--

No, the entire world would be in ruins...!

The innards of the clock towers have been used to construct this huge weapon.

Marie, I understand now why the city of Mie is dead.

Who in the world would do this!? And why?!

Going so far as to sacrifice a whole city to build this...

There are more than 6 times that many parts inside.

Even so, that wouldn't account for all of it.

ARE YOU SURE?!

LET'S GATHER SOME EVIDENCE QUICKLY AND GET OUT OF HERE!

Stop, Prin-cess.

THEY ARE SCREWING WITH ME...!

What?

We have to hurry up and escape.

This whole time, something has smelled--

Didn't I tell you?

!

And that "something" is coming...

A... A child?

It's been so long.

Oh my. Is that AnchoR?

why do you wear that mask?

We were mistaken to rely solely on Marie-sama's information.

EH? ANCHOR-CHAN? THIS GIRL?! ISN'T SHE SUP-POSED TO BE IN TOKYO?

But AnchoR ...

Requesting change in "power reservoir"... Approved.

Enemy threat level, category "two"...

This awful feeling I just can't shake...

It's enveloped me this whole time.

Anc-hor ...?

Begin shift to #3 difference loop...

Chrono-hook

Beginning imaginary output from perpetual gear.

So, this was the monster in question!
